LED Ring lamps

Streaming games, usually in the evening hours, requires intense, but properly diffused lighting so that the image from the camera is not overexposed and does not create undesirable shadows on the face. The biggest streamers on Twitch already know it, replacing the previously used lighting with ring lamps, connected directly to their PCs! Ring lights are used not only in the gaming world, but also in other areas of streaming! Compact design, perfect lighting conditions and the ability to adjust the colour temperature will also be appreciated by content creators on platforms such as Tik Tok or Instagram.

TRACER SELFIE 28 LED ■

LED Ring lamp

KTM 46799

The Tracer Ring Light will help you ensure perfect lighting, whether you use it for taking a selfie or for precise makeup application. The lamp offers three brightness levels, which means that you can adjust the lighting power to your needs. In the set with the Tracer lamp, you receive a clip that guarantees freedom of use. You can mount the device wherever you need and set it at the desired angle for the best effect.

TRACER RING 26 CM ■

LED Ring lamp with mini tripod

KTM 46747

Even the best cameras or video recorders cannot provide high quality image if the object is not properly illuminated. Our 10" ring lamp has an inner diameter of 20 cm (26 cm outer) and 120 LEDs, evenly distributed in the housing of the lamp. The lamp has light intensity adjustment in the range of 900-1700 lm and colour temperature adjustment (3 modes) in the range of 2700 to 7000 K. Our desktop set includes a tripod with 19 cm arms which, when fully open, reaches a height of 9 cm from the surface.

[▶ More info](#)

- 3 temperatures of light: warm, neutral, cold
- 10 brightness levels for each light color
- USB power supply
- MAX 1300 lm

- Flexible arms

Desk lamps

Working at a desk often places a heavy burden on the eyes, so it is worth taking care of proper lighting that will not flicker and tire our eyesight. A good desk lamp makes learning easier, relieves the eyes and even helps to concentrate.

TRACER ARTISTA ■

Clip clamp metal desk lamp

KTM 46762

The Tracer Artista desk lamp is a robust device that can be easily and securely attached to a desk or other horizontal surfaces. The lamp is equipped with a flexible arm with three joints, which allows you to adjust the angle of incidence of light. The Tracer lamp is made of a combination of metal and ABS, which makes it extremely resistant to damage.

► [More info](#)

- Clip clamp
- Metal lamp
- Adjustable inclination angle
- Cable length 165 cm

TRACER LUXIA ■

LED desk lamp with wireless charger and LCD display

KTM 46763

When working or during homework, or performing any other kind of precise activities, you can also charge your smartphone quickly and comfortably. The Tracer Luxia desk lamp is fitted with a very practical function: induction charger built into the base. All you need to do is to put your phone on the induction charging base, and the wireless charging will start automatically. The Tracer Luxia lamp emits light with power of 7W and a luminous flux of 400 lumens. Smooth adjustment of the light color temperature (warm, neutral, cold) within the range of 2700 - 4000 - 6500K allows to adjust the light to your individual preferences. On the back of the device, there are buttons allowing to configure the thermometer, date, and time. The Luxia desk lamp also allows to set the alarm clock. All measurements are displayed on the LCD screen in the front panel.

► [More info](#)

- Wireless charger
- LCD display: calendar, date, time, temperature, alarm clock
- Faux leather ABS
- 5V adapter

TRACER NEROLED desk lamp
with LCD display

KTM 46760

The Tracer Nero light is made of metal and high-quality ABS plastic which makes it extremely resistant to damage. High quality of materials also ensures long life of the device. The Tracer Nero lamp emits light with power of 5W and a luminous flux of 320 lumens. The adjustment of the light color temperature (warm, neutral, cold) within the range of 2800 - 4500 - 6000K allows to adjust the light to your individual preferences. On the back of the device, there are buttons allowing to configure the thermometer, date, and time. The Tracer Nero desk lamp also allows to set the alarm clock. All measurements are displayed on the LCD screen in the front panel.

► [More info](#)

■ LCD display: calendar, date, time, temperature, alarm clock

■ Maximum LED power 5W

■ 5V adapter

TRACER MOON RGB ■

Desk/night lamp

KTM 46761

The colour of light can complement the interior design of a room and also affects the mood of people staying inside. Do you wish to paint your bedroom in colours? The Tracer Moon Lamp is a perfect solution for you! The multicoloured Tracer Moon Bedside Lamp is equipped with a non-replaceable RGB LED light source. Thanks to this, you can set the selected lighting colour that the device will emit or use the additional option of smooth transition between various colours. The LED light used in the Tracer lamp has three levels of white light intensity adjustment. Intuitive touch control makes the operation of the lamp really simple and hassle-free.

► [More info](#)

- 3 levels of white light intensity
- Built-in battery 1200 mAh
- Additional program: the lamp changes colors smoothly from one color to another

LED cosmetic mirrors

Perfect makeup and skin care can boost your mood significantly. A LED-illuminated mirror is an indispensable element of every woman's equipment, especially today, when caring for the way you look is vital. The LED-illuminated mirror will light every part of your face, neck, and décolleté.

LAFE ROSA 28 ■

LED cosmetic mirror

KTM 46771

28 diodes placed around the mirror make the light even, illuminating every single spot. It allows you to see every detail that needs most focus and attention. White light emitted by the LEDs make every color visible in the mirror highly realistic. The mirror base has a notch which can be used as a tray for small makeup products.

- 28 LED diodes
- Built-in battery 1200 mAh
- Dimmable

LAFE IRIS 30 ■

LED cosmetic mirror

KTM 46770

The LED-illuminated Lafe mirror will light up every part of your face and ensure realistic color representation. 30 diodes placed around the mirror make the light even, illuminating every single spot. It allows you to see every detail that needs more focus and attention. What is more, you can adjust the luminous intensity of the diodes.

- 30 LED diodes
- Built-in battery 1200 mAh
- Dimmable

Bulbs

Tracer LED lights emit warm, bright light with 2700 K color temperature; thanks to frosted screens, the luminous flux is not blinding. LED lighting elements do not contain materials that are hazardous to the environment and human health, such as mercury, and their long life allows to replace light sources less frequently, and consequently, generate less waste.

TRACER ■

LED E14 bulb
5W=35W, warm bright,
2-pack

The LED TRACER E14 5W bulb is the perfect replacement for traditional filament ('candle') bulbs with small caps and power of up to 35 W. The E14 base is smaller than the standard format (E27) and is usually used e.g. in wall lamps, bedside and desktop lamps, both in offices and private homes.

LED E27 bulb
10W=60W, warm bright,
2-pack

The LED TRACER E27 10W bulb is the perfect replacement for traditional filament bulbs with thick caps and power of up to 60 W. Be both ecological and economical!

LED bulb GU10
6W=42W, warm bright,
2-pack

The LED TRACER GU10 6W bulb with bayonet mount is the perfect replacement for traditional filament lights with power of up to 42 W. TRACER GU10 bulbs can be applied in recessed luminaires – their construction allows them to direct the luminous flux downward, ensuring spotlight. They may also be installed in wall lamps and other lamps with GU10 mounts.
